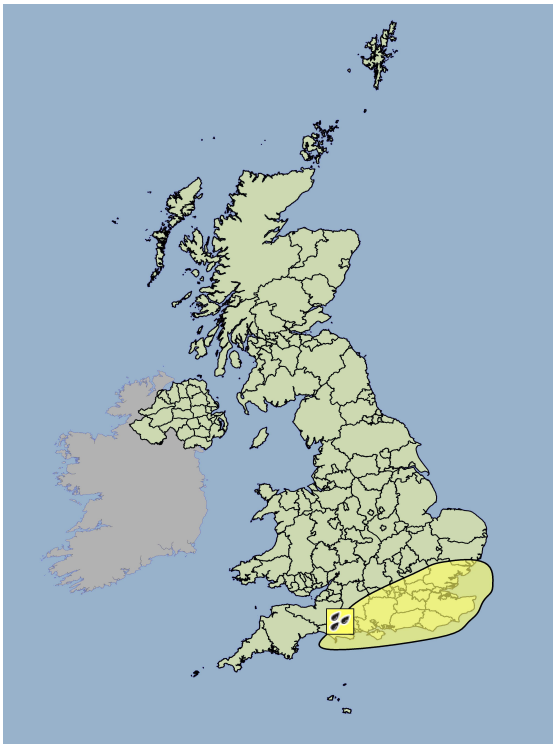
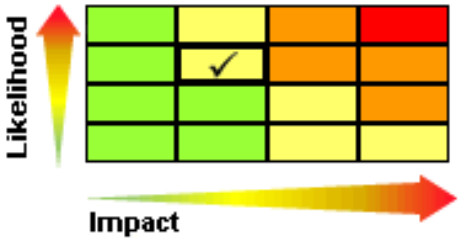
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure currently developing over the Atlantic Ocean is likely to track close to or across southern England later Friday and early Saturday, bringing with it a spell of wet weather.

Rain is expected to be the main hazard associated with this depression, 15 to 30 mm rain likely quite widely, perhaps locally 40 mm. English Channel coastal areas will also be windy for a time with gales and gusts up to 50 mph. Further inland, wind speeds are expected to be much lower.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **12:00 on Fri, 01st Nov 2013** until **23:59 on Fri, 01st Nov 2013**

A spell of heavy rain is expected to affect parts of southern England during Friday and early Saturday. The public should be aware of the risk of localised flooding.
